Design that sets a new standard.

3D Edgebanding: Perfection to the last detail

The unique nature of Doellken-Woodtape's 3D acrylic edgebanding offers brilliant optical effects. The finish is applied to the reverse side of the transparent edgebanding and is protected against damage that might occur during processing, transport and assembly. The finish stays intact even at the milled radii and joints. Any scratches occurring at a later point in time can be polished away with ease.

As a result, this high-quality design enhances your furniture design and leaves a lasting impression.

Design that attracts attention.

3D

3D Edgebanding: A special kind of depth effect

Only with the 3D effect can brilliant finishes display their true elegance. 3D edgebanding can be used as a match and contrast to any high-pressure laminate and thermofused melamine to assign the furniture a distinctive character.

New trends are continually created and further developed with Doellken-Woodtape's 3D edgebanding. This is especially true in regards to our broad stock selection of solid colors, woodgrains, metallics, translucent and iridescent finishes available in single rolls.

Design that radiates quality.

3D

3D Edgebanding: Highlights the most demanding applications

The advantages of impressive optical effects and outstanding technical quality are built into Doellken-Woodtape's 3D edgebanding, making it a truly unique product.

3D edgebanding can be polished to any desired gloss level following the current trend for glossy laminate finishes.

Standard buffing equipment and polishing compound for acrylic material are required.

Design that gives you a clean look.

3D Edgebanding: Creative diversity is our motto

3D edgebanding from Doellken-Woodtape is a suitable design solution for even the most extravagant application. In addition to solid colors, natural looking woodgrains, metallics, metallic-wood combination, iridescent and translucent from stock, Doellken-Woodtape offers unlimited custom options. Our current stock offering reflects North American furniture trends incorporating a material mix of plastic, glass, wood, translucent or transparent materials as well as urban looking metallics. The coordination with surface finishes of leading laminate manufacturers and the high number of exclusive and exquisite finishes offer the perfect foundation for creating furniture and fixture design.
